SECTION II - RISK FACTORS

Prospective investors should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, and under the section titled “Our Business” on page 57 of this Prospectus and under the section titled “Financial Information” appended as Annexure A of this Prospectus, before making an investment in the Bonds. The risks and uncertainties described in this section are not the only risks that we currently face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business prospects, results of operations and financial condition. If any of the following or any other risks actually occur, our business prospects, results of operations and financial condition could be adversely affected and the price of and the value of your investment in the Bonds could decline and you may lose all or part of your redemption amounts and / or interest amounts.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in the below risk factors. The numbering of risk factors has been done to facilitate ease of reading and reference, and does not in any manner indicate the importance of one risk factor over another.

In this section, unless the context otherwise requires, a reference to “NABARD” “we”, “us”, and “our” is a reference to National Bank for Agriculture and Rural Development. Unless otherwise specifically stated in this section, financial information included in this section have been derived from our standalone financial statements for Fiscal 2011, 2012, 2013, 2014 and 2015.

RISKS RELATING TO OUR BUSINESS AND INDUSTRY

1. *We have a significant concentration of outstanding loans to RIDF, STCCS, short term / medium term refinance loans and refinancing.*

NABARD has a mandate under the NABARD Act to provide credit and other support for the promotion and development of rural and agriculture sector. Consequently, NABARD cannot enter other business areas which do not comply with this purpose. The concentration of outstanding loans is specific to loans under RIDF to State Government, STCCS through State Co-Operative Banks, short term / medium term refinance loans to RRBs and refinance to commercial banks. Many of our business activities may be as per instructions or policies of the Government of India. Any change in Government of India's policy in this regard can impact the present business operations.

2. *We may not be able to recover, or there may be a delay in recovering, the expected value from security and collaterals for our loans, which may affect our financial condition and will result in increased non performing asset levels.*

As a part of our business, we extend loans to various persons and there can be no assurance that there will be payment of interest or principal in full by the entities that we lend to or that payment will be in a timely manner at all. Any negative trends such as higher NPAs within borrowers, broader economic issues, or financial difficulties, or inability on the part of any borrowers could result in an increase in our NPAs and adversely affect our business, financial condition and results of operations. While we have major concentration of NPAs in our co-financed portfolio, there is a trend of increasing NPAs in UPNRM. We cannot be sure that we will be able to improve our collections and recoveries in relation to our NPAs or otherwise adequately control our level of NPAs in future. Moreover, as our loan portfolio matures, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control or reduce our level of NPAs, the overall quality of our exposures may deteriorate and our results of operations may be adversely affected. Furthermore, our current provisions may not be adequate when compared to the exposures of other financial institutions. Moreover, there can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross NPAs or otherwise, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs. In the event of any further deterioration in our NPA portfolio, there could be an even greater, adverse impact on our results of operations.

3. *We may have not fully complied with the listing requirements for listing our bonds.*

Our debt securities are listed on the stock exchanges. We have issued bonds as part of our capital raising programme. We have entered into a Debt Listing Agreement with BSE for listing our debt securities. When issuing bonds we may not have complied with the disclosure requirements prescribed under the Securities and Exchange Board of India (Disclosure and Investor Protection) Regulations, 2000, as amended and the SEBI Debt Regulations. SEBI may also initiate proceedings against us for violations of the applicable provisions of the Securities and Exchange Board of India Act 1993, including the DIP Guidelines and the Debt Regulations, and we may be subject to sanctions, adjudicatory penalties and other adverse orders under legislation. There can be no assurance that SEBI or

BSE will not take any regulatory action against us for the past non-compliance. In the instance any regulatory action is taken against us this may have an adverse effect on our business, results of operations and financial condition.

4. ***Our borrowers' may not insure their assets and any insurance of assets may not be adequate to protect them against all potential losses to which they may be subject, which could affect our ability to recover the loan amounts due to us.***

Our borrowers may or may not maintain insurance against damage caused by any disasters including floods, fires and earthquakes or theft on their assets, revenues from which are used to repay loans granted by us. They may not have the required insurance coverage, or they have not renewed the insurance policies or the amount of insurance coverage may be less than the replacement costs of all covered property and is therefore insufficient to cover all financial losses that our borrowers may suffer. In the event the assets are damaged due to floods, fires and earthquakes it may affect our ability to recover the loan amounts due to us.

5. ***NABARD operates directly and indirectly in the rural and agricultural sectors in India and any impact on these sectors could adversely affect our business, results of operations and financial condition.***

NABARD's area of operation is the Indian rural sector. Any adverse impact on the state of rural economy may have a negative impact on us as well.

6. ***As a financial institution focused on rural development we have received certain grants / tax benefits and our borrowers have received certain tax benefits, subsidies and incentives in the past. We cannot assure that such grants, benefits, subsidies and incentives will be available to us and/or our borrowers in the future which may have an adverse effect on our business, profits, results of operations and financial condition.***

We provide finance to assist in agriculture cottage industry, small industry village and other rural industries development and have benefited from certain tax regulations and incentives that accord favourable treatment towards such sector. Further, NABARD is also eligible for certain tax benefits and incentives as a Public Financial Institution. As a consequence, our operations have been subject to relatively low tax liabilities. We cannot assure you that we would continue to be eligible for such lower taxes or any other benefits. In addition, it is possible that the draft Direct Tax Code, when notified, could significantly alter the taxation regime, including incentives and benefits, applicable to us. If the laws or regulations regarding the tax benefits applicable to us were to change, our taxable income and tax liability may increase to that extent, which would adversely affect our financial results.

7. ***Inability to develop or implement effective risk management policies and procedures could expose NABARD to unidentified risks or unanticipated levels of risk.***

Although NABARD follows various risk management policies and procedures and has a department to identify, monitor and manage risks, it may not be able to anticipate or address all risks that NABARD encounters in its business and operations or that such policies and procedures are comprehensive. NABARD's risk management is based, among other considerations, on historical market behaviour, information regarding borrowers and market knowledge. Consequently, these policies and procedures may not predict future risk exposures that could vary from or be greater than those indicated by historical measures. Failure of NABARD's risk management policies and procedures or exposure to unanticipated risks could lead to losses and adversely affect NABARD's business, financial condition and results of operations.

8. ***We have a dispersed network of regional offices and are exposed to operational risks, including employee negligence, fraud, petty theft, misappropriation of funds and embezzlement and misconduct, which could harm our results of operations and financial position.***

We have many Regional Offices and approximately 4,062 employees as at March 31, 2015 which exposes us to the risk of fraud by employees, agents, customers or third parties, theft, burglary and misappropriation, embezzlement or unauthorised transactions of misconduct by our employees. Our insurance policies, security systems and measures undertaken to detect and prevent these risks may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our recoveries, operations and profitability. Our employees may also become targets of the theft, burglary and other crimes if they are present when these crimes are committed, and may sustain physical and psychological injuries as a result. We may encounter difficulties in recruiting and retaining qualified employees due to this risk and our business and operations may be adversely affected. Further, we may be subject to regulatory or other proceedings in connection with any unauthorised transaction, fraud, misappropriation, embezzlement or misconduct by our representatives and employees, which could adversely affect our goodwill. This may have a negative impact on our operations and result in losses.

9. ***There are five casual vacancies on the Board which have not been filled and any further vacancies on the Board in the future may have an adverse impact on the management of NABARD.***

Under the NABARD Act, the Board is required to consist of, inter alia, (i) three directors who are experts in rural economics, rural development village and cottage industries, small-scale industries or persons having experience in the working of co-operative banks, regional rural banks or commercial banks or any other matter the special knowledge or professional experience in which is considered by the GoI as useful to NABARD, (ii) three directors from out of the directors of RBI, (iii) a managing director, and (iv) three directors from amongst the officials of the GoI. As on date of this Prospectus, there is one Director appointed on the Board under requirement specified in (i) above, two Directors each appointed on the Board under requirement specified in (ii) and (iv) above, and the position of the managing director is vacant. Additionally, while Mr. S. Vijayanand has been appointed as the Director of NABARD (in place of Mr. Jugal Kishore Mohapatra), he is yet to take charge of his post as the Director of NABARD. There is no assurance that these vacancies would be filled in a timely manner or at all. Any further vacancies on the Board in the future (including as a result of resignations) may have an adverse effect on the management of NABARD.

10. ***NABARD operates various schemes, funds and grants of the GoI and changes in these will affect our results of operations and financial position.***

NABARD operates a number of funds, schemes and grants to the rural sector in India in accordance with directions from the GoI and/or RBI. These may have criteria which need to be complied when funds, schemes and grants are disbursed and there may be no assurance that these will be complied with. Any changes in these directions, instructions or regulations or any changes in amounts, timing or otherwise may affect the functioning, implementation, the operations, balance sheet and other financial results of NABARD.

11. ***We are affected by volatility in interest rates for our lending operations as well as the rates at which NABARD borrows from banks / financial institutions, which could adversely affect our return on assets and profitability.***

Our business depends on interest income from our loans and advances made by us and the interest rates at which we borrow from banks / financial institutions. Accordingly, we are affected by volatility in interest rates in our borrowing and lending operations. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors. Further, rise in inflation and consequent fluctuation in interest rates, repo rates (the rates at which RBI lends to commercial banks) and reverse repo rates (the rates at which RBI borrows from commercial banks) by RBI has led to revision in the interest rates on loans provided by banks and financial institutions. Due to these factors, interest rates in India have experienced a relatively high degree of volatility. Our inability to effectively and efficiently manage such interest rate variations over the duration of the project loans may adversely affect our results of operations and profitability.

12. ***Properties used by NABARD for the purposes of its operations are owned by NABARD, however, title deeds may not be in the name of NABARD or properties may be leased. Any termination of the contractual agreements in connection with such properties or our failure to renew the same could adversely affect our business, results of operations and financial condition.***

Currently, properties used by NABARD for the purposes of our operations are either owned or leased by us. For further details, please see section titled “***Our Business - Properties***” on page 70 of this Prospectus. In relation to properties owned by us, either conveyance deeds may not have been executed by developers with us or may not have been registered with the relevant Registrar of Sub Assurances or title deeds may not be in our name. In relation to leased properties, these are subject to the risk of renewal upon the expiry of the lease with the landlord and subject to mutually agreeable terms for renewal being negotiated. If there is attempt to evict us or seek to renew an agreement on terms and conditions unfavorable to us, we may suffer a disruption in our operations or increased costs. Any failure to have properties registered in our name or our failure to renew leases, in a timely manner, or at all, could expose us to the risks of disruptions in our operations or increased costs, or both, which may adversely affect our business and results of operations and financial condition.

13. ***A decline in our capital adequacy ratio could restrict our future business growth.***

In accordance with applicable laws and regulations we are required to maintain a CRAR of at least 9%. Our CRAR was 16.91% as of March 31, 2015. There can be no assurance that we will be able to maintain our CRAR at the same level in future.

14. ***As we do not have equity or equity linked securities listed on any Indian stock exchange, we are not required to follow the standards of corporate governance and, accordingly our standard of corporate governance compliance and levels of internal controls may be limited.***

The corporate governance requirements stipulated in the NABARD Act is applicable to NABARD. In accordance with the NABARD Act, NABARD is required to have a Chairman, three directors from amongst experts in rural economics, rural development village and cottage industries three directors from out of the directors of the Reserve Bank and three directors from the amongst the officials of the GoI on our Board. For more information, please see sections titled “**Main Provisions of the National Bank for Agriculture and Rural Development Act, 1981 and the Regulations**” and “**Our Management**” on pages 149 and 79 of this Prospectus. In terms of the SEBI LODR Regulations, entities whose equity and equity linked securities (as defined under the SEBI LODR Regulations) are listed on the Indian stock exchanges and whose chairman is an executive director, are subject to specific requirements such as that at least one half of their board of directors is comprised of independent directors. Since we do not have any equity or equity listed securities listed on any recognised stock exchange in India, the SEBI LODR Regulations to the aforesaid extent is not applicable to us. Accordingly, the standard of corporate governance complied by us is limited in comparison with the corporate governance standards required to be adhered to by entities having their equity securities listed on Indian stock exchanges.

15. ***NABARD is subject to credit, market, currency and liquidity risks and, if any such risk were to materialise, NABARD’s credit ratings and its cost of funds may be adversely affected.***

NABARD has put in place an asset liability management system. The asset liability management framework includes periodic analysis of long term liquidity profile of asset receipts and debt service obligations. Such analysis is being used for critical decisions regarding the time, volume and maturity profile of the borrowing, creation of new assets and mix of assets and liabilities in terms of time period (short, medium and long-term). At present surplus funds are invested by way of short-term deposits with banks, debt oriented liquid mutual funds, commercial paper, certificate of deposit, bonds and listed equity. NABARD also has some of its borrowing in foreign currency and to that extent is exposed to foreign currency risks.

In particular, NABARD is increasingly reliant on funding from the debt capital markets. The market for such funds is competitive and NABARD’s ability to obtain funds on acceptable terms will depend on various factors including, in particular, NABARD’s ability to maintain its credit ratings. Furthermore, our financial position may also be aggravated if NABARD’s borrowers pre-pay or are unable to repay any of the financing facilities NABARD grants to them. Despite the existence of various asset liability management policies, NABARD’s liquidity position could be adversely affected by the development of an asset-liability mismatch, which could have a material adverse effect on NABARD’s business, prospects, results of operations and financial condition.

NABARD’s revenues and interest rate risk are dependent upon its ability to properly identify, and mark-to-market, changes in the value of financial instruments caused by changes in market prices or rates. NABARD’s earnings are dependent upon its effectiveness in managing credit quality and risk concentrations, the accuracy of its valuation models and its critical accounting estimates and the adequacy of its allowances for loan losses. To the extent its assessments, assumptions or estimates prove inaccurate or are not predictive of actual results, NABARD could incur higher than anticipated losses.

Further, while the current foreign borrowings of NABARD are hedged, there can be no assurance that the foreign borrowings utilised by NABARD in the future would be hedged. Such instances could significantly effect our business and operations and financial conditions.

16. ***NABARD may in the future conduct additional business through strategic partnerships and investments and may expand by opening more Regional Offices or District Development Offices, exposing NABARD to certain business and market risks.***

NABARD intends to continue to pursue suitable strategic partnership and other investment opportunities in India particular with companies or firms whose resources, capabilities and strategies are likely to enhance and diversify NABARD’s business operations in the agricultural and rural development sector. NABARD may not be able to identify suitable joint venture or strategic partners or NABARD may not complete transactions on terms commercially acceptable to NABARD, or may not complete transactions at all. NABARD may not be able to successfully form such alliances and ventures or realise the anticipated benefits of such alliance and joint ventures. In addition, NABARD’s expected strategic benefits or synergies of any future partnerships may not be realised. Furthermore, such investments in strategic partnerships may be long-term in nature and may not yield returns in the short to medium term. Such initiatives will place significant strains on NABARD’s management, financial and other resources and any unforeseen costs or losses could adversely affect its business, profitability and financial condition.

We may expand our business by opening more Regional Offices or District Development Offices which will depend on NABARD's ability to develop such regional office and any unforeseen costs or losses could adversely affect its business, profitability and financial condition.

17. *There are outstanding legal proceedings in which NABARD is involved, and any adverse decision in such proceedings may have a material adverse effect on our business, result of operations and financial condition.*

NABARD is currently involved in certain proceedings and claims in India pending at different levels of adjudication before various authorities. For details in relation to the legal proceedings involving us for an amount equal to or more than ₹ 10 crore, disputed income tax liabilities and other material proceedings against us, please see section titled “**Outstanding Litigations and Material Developments**” on page 97 of this Prospectus. Additionally, should any new development arise against us by appellate courts or tribunals, we may need to make provisions in our financial statements, which may reduce our profitability. We can give no assurance that these legal proceedings will be decided in our favour. There may be legal proceedings that arise at any time in the future in the course of our business. Any adverse outcome in any or all of current or future proceedings may have a material adverse effect on our business, results of operations and financial condition.

18. *Our success depends on our management team and skilled personnel and our ability to attract and retain such persons.*

Our future performance will be affected by the continued service of our management team and our ability to attract and retain skilled personnel. Our senior and middle management personnel have significant experience and in-depth industry knowledge and expertise. We also face a continuing challenge to recruit and retain skilled personnel, knowledgeable in the agricultural sector to which we lend. There is significant competition in India for such personnel, and it may be difficult to attract, adequately compensate and retain the personnel we need in the future. Inability to attract and retain appropriate managerial personnel, or the loss of key personnel could adversely affect our business, prospects, results of operations and financial condition.

19. *We do not have a registration for our trademark, name and logo. Our ability to use the trademark, name and logo may be impaired.*

The application for registration of trademark of NABARD has been made. For details of the application, please see section titled “**Our Business**” on page 70 of this Prospectus. If our trademark application is objected or opposed or our trademark, name or logo is registered by a third party, we will not be able to make use of this trademark, name or logo in connection with our business and consequently, we may be unable to capitalize on the brand recognition associated with NABARD. Accordingly, we may be required to invest significant resources in developing a new name and logo.

20. *The risks to financial stability could adversely affect NABARD's business.*

As reported by the RBI in its financial stability report dated June 26, 2015, the gross NPAs in the banking system have grown, while stressed advances including standard restructured loans have risen since September 2014. This deterioration in asset quality is expected to continue into the next few quarters as well. Profitability measured by return on assets and return on equity remained around the same level during the last two years. The banking stability map suggests that the overall risks to the banking sector have moderated marginally since September 2014. However, concerns remain over the continued weakness in asset quality and profitability. NABARD has little or no control over any of these risks or trends and may be unable to anticipate changes in economic conditions. Adverse effects on the Indian banking system could impact NABARD's funding and adversely affect NABARD's business, operations and financial condition and the market price of the Bonds.

21. *We have granted loans to certain borrowers on a non-recourse or limited recourse basis, which increases the risk of non-recovery and may adversely affect our financial condition.*

The ability of our borrowers to perform their obligations under their loans will depend primarily on the financial condition and results of their assets, which may be affected by many factors beyond the borrowers' control, including operating costs and other risks. If borrowers with non-recourse or limited recourse loans were to be adversely affected by these or other factors and were unable to meet their obligations, the value of the underlying assets available to repay the loans may become insufficient to pay the full principal and interest on the loans, which could expose us to significant losses.

22. *The effects of the planned convergence with IFRS and the adoption of IND-AS are uncertain.*

The GoI, Ministry of Corporate Affairs has drawn a revised road-map for companies other than banking companies, insurance companies and NBFCs for implementation of Indian Accounting standards converged with the IFRS on voluntary basis for accounting periods beginning on or after April 1, 2015 and on mandatory basis for accounting

periods beginning on or after April 1, 2016 / April 1, 2017. Companies not covered by the above roadmap shall continue to apply existing Accounting Standards. NABARD is currently not covered under the above roadmap. Hence, NABARD will continue to apply existing Accounting Standards. However, NABARD may, in the future, be required to prepare its annual and interim financial statements under IND-AS.

23. *This Prospectus includes certain unaudited standalone financial information, which has been subjected to limited review, in relation to NABARD. Reliance on such information should, accordingly, be limited.*

This Prospectus includes certain unaudited standalone financial information in relation to NABARD, for the six months ended September 30, 2015, in respect of which the Statutory Auditors of NABARD have issued their limited review report dated October 29, 2015. As this financial information has been subjected only to limited review as required by the stock exchanges, in accordance with the debt listing agreement, and not to an audit, any reliance by prospective investors on such unaudited standalone financial information for the six months ended September 30, 2015 should, accordingly, be limited. Moreover, our financial results for any given fiscal quarter or period, including the six months ended September 30, 2015, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors in the Issue are advised to read such unaudited standalone financial information for the six months ended September 30, 2015 in conjunction with the audited financial information provided in the section titled “**Financial Information**” as appended as **Annexure A** of this Prospectus.

24. *The GoI holding 99.60% stake in NABARD, which enables the GoI to significantly influence NABARD*

As at date hereof, the GoI has 99.60% stake in the capital of NABARD. As a result, the GoI will continue to exercise significant control over NABARD. The GoI also controls the composition of the Board and determines matters requiring approval by the Board. The GoI may take or block actions with respect to NABARD’s business, which may conflict with NABARD’s interests or in accordance with the NABARD Act, may require NABARD to implement its broader policy objectives. By exercising its control, the GoI could delay, defer or cause a change of NABARD’s control, divest part of it or a change in NABARD’s capital structure, or a merger, consolidation, takeover or other business combination involving NABARD, or discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of NABARD.

Our borrowers are also significantly impacted by GoI policies and support in a variety of ways. In particular, GoI has in the past made sustained increases to budgetary allocations towards projects and schemes related to agricultural and rural development. Any adverse changes in the government policies may have an impact on our financing and re-financing arrangements and could adversely affect our business, prospects, results of operations and financial condition.

25. *If we are unable to manage our growth effectively, our business and financial results could be adversely affected.*

Our business has grown since we began operations. Our total loan assets increased from ₹ 1,39,489 crore as of March 31, 2011 to ₹ 2,52,368 crore as of March 31, 2015. As at March 31, 2015, the profit after tax of NABARD is ₹ 2,403.26 crore, net revenue has been ₹ 17,804.46 crore and NABARD’s net worth is ₹ 24,328.84 crore. We intend to continue to grow our business, which could place significant demands on our operational, credit, financial and other internal risk controls. It may also exert pressure on the adequacy of our capitalization, making management of asset quality increasingly important.

Our asset growth will be primarily funded by the issuance of new debt. We may have difficulty in obtaining funding on attractive terms. Adverse developments in the Indian credit markets, such as increase in interest rates, may significantly increase our debt service costs and the overall cost of our funds. Any inability to manage our growth effectively on favourable terms could have a material adverse effect on our business and financial performance.

26. *Our insurance may not be adequate to protect us against all potential losses to which we may be subject.*

We maintain insurance for our physical assets such as our regional offices against standard fire and special perils (including earthquake). The details of the same are set out in the section titled “**Our Business - Insurance**” on page 70 of this Prospectus. However, the amount of our insurance coverage may be less than the replacement cost of such property and may not be sufficient to cover all financial losses that we may suffer should a risk materialize. If we were to incur a significant liability for which we were not fully insured, it could have a material adverse effect on our results of operations and financial position.

27. *Security of NABARD’s information technology systems may fail and adversely affect NABARD’s business, operations, financial condition and reputation.*

NABARD is dependent on the effectiveness of its information security policies, procedures and capabilities to protect its computer and telecommunications systems and the data such systems contain or transmit. An external

information security breach, such as a hacker attack, fraud, a virus or worm, or an internal problem with information protection, such as a failure to control access to sensitive systems, could materially interrupt NABARD's business operations or cause disclosure or modification of sensitive or confidential information. NABARD's operations also rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. NABARD's computer systems, software and networks may be vulnerable to unauthorised access, computer viruses or other malicious code and other events that could compromise data integrity and security. Although NABARD maintains procedures and policies to protect its IT systems, such as a data back-up system, disaster recovery and a business continuity system, any failure of NABARD's IT systems as mentioned above could result in business interruption, material financial loss, regulatory actions, legal liability and harm to NABARD's reputation. Furthermore, any delay in implementation or disruption of the functioning of NABARD's IT systems could disrupt its ability to track, record, process financial information or manage creditors / debtors or engage in normal business activities.

28. *Our business may be adversely affected by future regulatory changes.*

We are subject to the NABARD Act and regulatory framework of RBI / GoI with respect to financial institutions in effect in India which require continued monitoring and compliances. The introduction of additional government control or newly implemented laws and regulations including, among other things, in relation to provisioning for NPAs, recoveries, capital adequacy requirements, exposure norms, etc., depending on the nature and extent thereof and our ability to make corresponding adjustments, may result in a material adverse effect on our business, results of operations and financial condition and our future expansion plans in India. In particular, decisions taken by regulators concerning economic policies or goals that are inconsistent with our interests, could adversely affect our results of operations. While we will take adequate measures, we cannot assure you that we will be able to timely adapt to new laws, regulations or policies that may come into effect from time to time with respect to the financing for the purposes of development in agricultural and rural sector in general. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, results of operations and financial condition. For further details, please see section titled "***Regulations and Policies***" on page 72 of this Prospectus.

RISKS RELATING TO THE INDIAN ECONOMY

29. *A slowdown in economic growth in India could adversely impact our business.*

Any slowdown in the Indian economy or in the growth of the industry to which NABARD provides financing to or any future volatility in global commodity prices could adversely affect NABARD's borrowers and the growth of NABARD's business, which in turn could adversely affect NABARD's business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, currency exchange rates, adverse conditions affecting agriculture, commodity and electricity prices or various other factors. Furthermore, conditions outside India such as slowdowns in the economic growth of other countries could have an impact on the growth of the Indian economy and GoI policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, Europe or China, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sovereign credit crisis in Europe, has led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the effect of the global financial turmoil, any prolonged financial crisis may have an adverse impact on the Indian economy, thereby having a material adverse effect on NABARD's business, financial condition and results of operations.

30. *A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact NABARD's financial condition.*

A decline in India's foreign exchange reserves could impact the value of the Rupee and result in reduced liquidity and higher interest rates, which could adversely affect NABARD's future financial condition. Alternatively, high levels of foreign funds inflow could add excess liquidity to the system, leading to policy interventions, which would also allow slowdown of economic growth. In either case, an increase in interest rates in the economy following a decline in foreign exchange reserves could adversely affect NABARD's business, prospects, financial condition and results of operations.

31. *Difficulties faced by other banks, financial institutions or NBFCs or the Indian financial sector generally could cause our business to be adversely affected.*

We are exposed to the risks of the Indian financial sector which in turn may be affected by financial difficulties and other problems faced by Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years particularly in managing risks associated with their portfolios and matching the duration of their assets and liabilities, and some banks have also faced serious financial and liquidity crises. Since NABARD provides financing and re-financing to various financial institutions any major difficulty or instability experienced by the such financial institutions and Indian financial sector could create adverse market perception, which in turn could adversely affect our business, prospects, results of operations and financial condition.

32. *Economic developments and volatility in securities markets in other countries may negatively affect the Indian economy.*

The Indian securities market and the Indian economy are influenced by economic and market conditions in other countries. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India.

Factors such as concerns over recession, inflation or deflation, energy costs, geopolitical issues, slowdown in economic growth in China and Renminbi (Chinese Yuan) devaluation, commodity prices and the availability and cost of credit have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the United States and global credit and financial markets.

In the event that the current difficult conditions in the global financial markets continue or if there are any significant financial disruptions, this could have an adverse effect on NABARD's cost of funding, business, future financial performance and the trading price of any Bonds issued under the Programme. Negative economic developments, such as rising Fiscal or trade deficits, or a default on national debt in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

33. *Political instability or changes in GoI could delay the liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact our financial results and prospects.*

NABARD is incorporated in India, derives its revenues from operations in India and all its assets are located in India. Consequently, NABARD's performance may be affected by interest rates, GoI policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise significant influence over many aspects of the Indian economy. NABARD's business, may be affected by changes in the GoI's policies, including taxation. Current macro-economic situations and global conditions might lead to a gradual departure from an accommodative fiscal and monetary policy, which would affect exchange rates and interest rates. Such events could also affect India's debt rating, NABARD's business, its future financial performance and the trading price of the Bonds.

34. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, floods and drought in the recent past. For example, unprecedented rains and flash floods in Tamil Nadu, earth quake in Nepal, Uttarakhand and earthquake in Sikkim. The extent and severity of these natural disasters determine their impact on the Indian economy and particularly the rural sector. Prolonged spells of below normal rainfall in the country or other natural calamities could have a negative impact on the Indian economy, affecting NABARD's business and potentially causing the trading price of the Bonds to decrease. Because NABARD's operations are located in India, NABARD's business and operations could be interrupted or delayed as a result of a natural disaster in India, which could affect NABARD's business, financial condition and results of operations. Health epidemics could also disrupt NABARD's business. Any future outbreak of health epidemics may restrict the level of business activity in affected areas, which may in turn adversely affect NABARD's business.

35. ***Recent global economic conditions have been unprecedented and challenging and have had, and continue to have, an adverse effect on the Indian financial markets and the Indian economy in general, which has had, and may continue to have, a material adverse effect on our business, financial condition and results of operations.***

Recent global market and economic conditions have been unprecedented and challenging with tighter credit conditions and recession in most major economies. Continued concerns about the systemic impact of potential long-term and wide-spread recession, energy costs, geopolitical issues, the availability and cost of credit, and the global housing and mortgage markets have contributed to increased market volatility and diminished expectations for western and emerging economies.

As a result of these market conditions, the cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. Concern about the stability of the markets generally and the strength of counterparties specifically has led many lenders and institutional investors to reduce, and in some cases, cease to provide credit to businesses and consumers. These factors have led to a decrease in spending by businesses and consumers alike and corresponding decreases in global infrastructure spending and commodity prices. Continued turbulence in the United States, Europe and other international markets and economies and prolonged declines in business consumer spending may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our customers, including our ability to refinance maturing liabilities and access the capital markets to meet liquidity needs.

These global market and economic conditions have had, and continue to have, an adverse effect on the Indian financial markets and the Indian economy in general, which may continue to have a material adverse effect on our business and our financial performance.

36. ***Companies operating in India are subject to a variety of Central and State Government taxes and surcharges.***

Tax and other levies imposed by the Central and State Governments in India that affect the tax liability of the Corporation include Central and state taxes and other levies including income tax, value added tax, service tax, stamp duty and other special taxes surcharges and cess. These taxes are extensive and subject to change from time to time. There is a proposal to introduce a new Goods and Services Tax (GST) from April 1, 2016 that would replace the indirect taxes on goods and services such as Central excise duty, service tax, Central sales tax, State VAT, surcharge, luxury tax, octroi, entry tax, cess etc. currently being collected by the Central or State Governments. Any such amendments may affect the overall tax liability of Companies operating in India and result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

RISKS RELATING TO THE BONDS

37. ***There is no guarantee that the Bonds issued pursuant to the Issue will be listed on BSE in a timely manner, or at all.***

In accordance with Indian law and practice, permissions for listing and trading will not be granted until after the Bonds have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Bonds to be submitted. There could be a failure or delay in listing the Bonds on BSE.

38. ***No DRR for the Bonds is proposed to be maintained for the present issue of Bonds and the Bondholders may find it difficult to enforce their interests in the event of or to the extent of a default.***

The obligation to maintain a DRR is applicable only to companies registered under the Companies Act / Companies Act, 2013. From the definitions laid down by SEBI under SEBI Debt Regulations, it may be observed that the definition of issuer includes a company. Certain mandatory requirements are required of all issuers whereas certain requirements like creation of a DRR is required only if the issuer is a company. The term “**issuer**” is much wider tends to include public sector undertakings and statutory corporations besides companies. NABARD is a statutory authority making a public issuance of debt securities and so it falls under the definition of “**issuer**” but it is not a company. Hence, NABARD being an “**issuer**” but not a “**company**”, the requirement to maintain a DRR in compliance under Rule 18 (7) of the Companies (Share Capital and Debentures) Rules, 2014 is not applicable to it. Further, there is no obligation on NABARD under the NABARD Act, the SEBI Debt Regulations and the Companies (Share Capital and Debentures) Rules, 2014. Therefore, NABARD is not maintaining a DRR for the present issue of Bonds and the Bondholders may find it difficult to enforce their interests in the event of or to the extent of a default.

39. ***There has been no prior public market for the Bonds and it may not develop in the future, and the price of the Bonds may be volatile.***

The Bonds have no established trading market. There can be no assurance that an active public market for the Bonds will develop or be sustained. The liquidity and market prices of the Bonds can be expected to vary with changes in market and economic conditions, our financial condition and prospects and other factors that generally influence market price of Bonds. Such fluctuations may significantly affect the liquidity and market price of the Bonds, which may trade at a discount to the price at which you purchase the Bonds.

40. ***The Bonds are classified as ‘tax free bonds’ and accordingly, only the interest payable on them is eligible for tax exemption under Section 10(15)(iv)(h) of the Income Tax Act.***

The Bonds are classified as ‘tax free bonds’ issued in terms of Section 10(15)(iv)(h) of the Income Tax Act and the CBDT Notifications. In accordance with the said section, the amount of interest on such bonds shall be entitled to exemption under the provisions of Income Tax Act. Therefore only the amount of interest on bonds is exempt and not the actual amount of investment.

41. ***You may not be able to recover, on a timely basis or recover at all, the full value of the outstanding amounts and/or the interest accrued thereon, in connection with the Bonds.***

Our ability to pay interest accrued on the Bonds and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors, including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the Bonds and/or the interest accrued thereon in a timely manner, or repay at all.

42. ***Any downgrading of India’s debt rating, NABARD credit rating or the rating of our Bonds may affect the trading price of our Bonds and our ability to raise funds***

India is rated by several international rating agencies, changes to which could impact NABARD and the Bonds. NABARD and the Bonds have been rated “CRISIL AAA / Stable” by CRISIL and “IND ‘AAA’ / Stable” by India Ratings pursuant to the credit rating letters dated February 19, 2016 and February 22, 2016. There can be no assurance that these ratings will not be further revised, suspended or withdrawn or downgraded, which could have a material adverse effect on NABARD’s business and future financial performance, NABARD’s ability to obtain financing for providing finance to the rural sector. These ratings may be suspended, withdrawn or revised at any time. Any revision or downgrading in the credit rating may lower the trading price of the Bonds and may also affect our ability to raise further debt. For the rationale for these ratings, please see **Annexure B** appended to this Prospectus.

43. ***There may be a delay in making refunds to applicants.***

We cannot assure that the monies refundable to applicants, on account of (a) withdrawal applications, (b) withdrawal of the Issue, or (c) failure to obtain the final approval from the exchanges for listing of Bonds, (d) non allotment due to technical rejections or over subscriptions, will be refunded to the applicants in a timely manner.

44. ***Risk regarding enforcement of security on account of default.***

Taking into account the nature of security and since most of the security is of peculiar nature i.e. fixed assets of NABARD, being highway project comprising of all superstructure including highway lightings, road barriers and dividers, bridges, culverts and all other super structures constructed on national highways entrusted to NABARD, enforcement of security will be tedious in nature, difficult and its realisable value will depend upon the market condition at that time and various extraneous factors at relevant time. The Trustee is not a guarantor and will not be responsible for any loss or claim.

45. ***Payments made on the Bonds will be subordinated to certain tax and other liabilities preferred by law.***

The Bonds will be secured by a charge on the book debts of NABARD. However, the Bonds may be subordinated to certain liabilities preferred by law. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining, after paying amounts relating to these proceedings, to pay amounts due on the Bonds. Further, there is no restriction on the amount of debt securities that we may issue that may rank above the Bonds. The issue of any such debt securities may reduce the amount recoverable by investors in the Bonds on our bankruptcy, winding-up or liquidation.

46. *The Bonds are not guaranteed by the Republic of India.*

The Bonds are not the obligations of, or guaranteed by, the Republic of India. In addition, the GoI is under no obligation to maintain the solvency of NABARD. Therefore, investors should not rely on the GoI ensuring that NABARD fulfils its obligations under the Bonds.

47. *Legal investment considerations may restrict certain investments*

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (i) the Bonds are legal investments for it, (ii) the Bonds can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of the Bonds.

48. *The Bonds are subject to the risk of change in law.*

The terms and conditions of the Bonds are based on Indian law in effect as of the date of issue of the relevant Bonds. No assurance can be given as to the impact of any possible judicial decision or change to Indian law or administrative practice after the date of issue of the relevant Bonds and any such change could materially and adversely impact the value of any Bonds affected by it.

49. *Some of the information included in this Prospectus has been prepared by third parties and may be inaccurate or outdated.*

However, the information taken from third parties and included in this Prospectus may be inaccurate and outdated, and NABARD makes no representation or warranty, express or implied, as to the accuracy or completeness of this information. Overview

NABARD is an apex development institution in India, having its headquarters in Mumbai (Maharashtra). NABARD has a mandate under the NABARD Act to facilitate credit and other facilities for the promotion and development of agriculture, small scale industries, cottage and village industries, handicrafts and other rural crafts and other allied economic activities in rural areas in India with a view to promoting integrated rural development. It was established on July 12, 1982 by a special Act of Parliament and its main focus has since been the upliftment and development of rural India by increasing the credit flow for elevation of agriculture and rural non-farm sector. It completed 34 years on January 1, 2016. It has been entrusted with matters concerning policy, planning and operations in the field of credit for agriculture and other economic activities in rural areas in India. As on March 31, 2015, NABARD operates throughout the country through its 31 Regional Offices, a cell at Srinagar and Training establishments at Lucknow, Bolpur and Mangalore. It also has 400 District Development Offices across the country as of March 31, 2015. It also has the mandate to support all other allied economic activities in rural areas, promote integrated and sustainable rural development and secure prosperity of rural areas.

Genesis and Mission

NABARD was a product of CRAFTCARD lead by the Chairman Mr B. Sivaraman, a former member of Planning Commission of India, GoI. The Sivaraman Committee was constituted by the RBI on March 30, 1979 at the instance of the GoI, to review the arrangements for institutional credit for agricultural and rural development. This committee, in its interim report, submitted on November 28, 1979, felt the need for a new organisational structure for providing undivided attention, forceful direction and pointed focus to the credit problems arising out of integrated rural development and recommended the formation of National Bank for Agriculture and Rural Development. The Parliament, through Act, 61 of 1981, approved the setting up of NABARD. Eventually the institution came into existence on July 12, 1982 by transferring the agricultural credit functions of RBI and refinance functions of the then ARDC. NABARD was dedicated to the service of the nation by the late Prime Minister Smt. Indira Gandhi on November 5, 1982.

NABARD was set up with an initial capital of ₹ 100 crores. Consequent to the revision in the composition of share capital between GoI and RBI, the share capital as on March 31, 2015, stood at ₹ 5,000 crores with GoI holding ₹ 4,980 crores (99.60%) and RBI ₹ 20.00 crores (0.40%).

NABARD functions with the mission to “Promote sustainable and equitable agriculture and rural prosperity through effective credit support, related services, institution development and other innovative initiatives.”

Ownership of NABARD

Initially, RBI held 72.5% of share capital in NABARD amounting to ₹ 1,450 crores. The remaining shareholding of ₹ 550 crore was with the GoI. The Union Cabinet in May 2008 approved the RBI's proposal to transfer its shareholding in NABARD to the GoI. Accordingly, the GoI issued a notification on September 16, 2010 prescribing the proportion of subscription/ownership of GoI and RBI in NABARD as 99% and 1% respectively. In terms of RBI circular dated October 14, 2010, RBI had divested its stake amounting to ₹ 1,430 crores in NABARD on October 13, 2010. With this, the RBI's holding in NABARD came down to 1% of shareholding in NABARD. In September 2013, GoI gave an amount of ₹ 700 crores towards share capital. Consequent to this the shareholding of GoI and RBI in the share capital of NABARD as at the date of this Prospectus is at 99.60:0.40, respectively.

Business Operations

NABARD undertakes its financings activities through direct finance and refinance which is available to SCARDBs, State Co-operative Banks, RRBs, Commercial Banks and other financial institutions approved by RBI.

2. Capital gains

A) For resident bondholders

(a) Long-term capital gains

Under section 2(29A) read with section 2(42A) of the Act, bonds listed in a recognised stock exchange held as a capital asset are treated as a long-term capital asset if they are held for a period of more than twelve months immediately preceding the date of their transfer.

From the full value of consideration, the following amounts should be deducted to arrive at the amount of long-term capital gains:

- Cost of acquisition as adjusted by the cost inflation index notified by the Central Government in the Official Gazette; and
- Expenditure incurred wholly and exclusively in connection with such transfer.

Under section 112 of the Act, capital gains arising to a resident from transfer of a long-term capital asset being listed securities are taxed at the rate of 20% of capital gains after reducing indexed cost of acquisition or 10% of capital gains after reducing cost of acquisition (i.e. without indexation). However, as per third proviso to section 48 of the Act, indexation benefit is not available in computing long-term capital gain arising from the transfer of a long-term capital asset being bond or debenture other than capital indexed bonds issued by the Government. Thus, long-term capital gain tax can be considered at a rate of 10% on listed bonds without indexation.

Further, where in case of an individual or an HUF, being a resident, the total income as reduced by such long-term capital gains is below the maximum amount which is not chargeable to income-tax, then such long-term capital gains shall be reduced to the extent of such shortfall and only the balance of the long-term capital gains shall be computed at the rate of ten per cent in accordance with and the proviso to sub-section (1) of section 112 of the Act.

In case of an individual or HUF, being a resident, where the total income as reduced by the long term capital gains is below the maximum amount not chargeable to tax i.e. Rs.2,50,000 in case of resident individual/HUF, Rs. 3,00,000 in case of resident senior citizens of 60 or more years of age (on any day of the previous year) and Rs. 500,000 in case of resident super senior citizens of 80 years or more of age (on any day of the previous year), the long term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and at the option of assessee the tax on the balance of such long-term capital gains shall be computed at the rate of 10% in accordance with and the proviso to sub-section (1) of section 112 of the Act read with CBDT Circular No. 721 dated September 13, 1995.

(b) Short-term capital gains:

Short-term capital gains on the transfer of listed bonds, where bonds are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provision of the Act.

B) For Non-resident bondholders

(a) Long-term Capital Gain

Similar to the taxation of long-term capital gain in the hands of the resident bondholder (as discussed above), long-term capital gains arising from transfer of a capital asset, being bonds listed on a recognised stock exchange, will be taxable at the rate of 10 percent without indexation.

As per the provisions of section 115AD of the Act, long-term capital gains arising to Foreign Institutional Investors ('FIIs') /Foreign Portfolio Investors (FPI), on sale of bonds would be taxed at 10 percent, without indexing the cost of acquisition.

(b) Short-term Capital Gain

In case of non-resident bondholders other than FIIs/ FPI, short-term capital gains on the transfer of listed bonds, where bonds are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provision of the Act.

The normal rate of tax for Non-resident Individuals (NRIs) and Persons of Indian Origin (PIOs) are same as tabulated above (tax rate applicable to resident individual on short-term capital gains).

The normal rate of tax in case of a foreign company is 40 per cent.

As per the provisions of section 115AD of the Act, short-term capital gains arising to Foreign Institutional Investors ('FIIs') /Foreign Portfolio Investors (FPI), on sale of bonds would be taxed at 30 percent.

(c) Double Taxation Avoidance Agreement (DTAA)

Section 90 of the Act provides that where the Government of India has entered into a DTAA with the Government of any other country or specified territory outside India, the provisions of the Act will apply to the extent they are more beneficial to the tax payer.

The Finance Act, 2013 has amended section 90(4) in the Act to provide that an assessee, not being a resident, to whom the provisions of the DTAA apply, shall not be entitled to claim any relief under such DTAA unless a certificate, of his being a resident in any country outside India or specified territory outside India, as the case may be, is obtained by him from the Government of that country or specified territory.

C) Securities Transaction Tax (STT)

Securities Transaction Tax ("STT") is a tax being levied on all transactions in specified securities traded on the stock exchanges at rates prescribed by the Central Government from time to time. STT is not applicable on transactions in the bonds.

D) Tax Deducted at Source (TDS)

No tax is required to be deducted at source from capital gains arising at the time of sale/redemption of the bonds by resident bondholders.

Under Section 195 of the Act, income-tax shall be deducted from sum payable to non-residents on long-term capital gain and short-term capital gain arising on sale and purchase of bonds at the rate specified in the Finance Act of the relevant year or the rate or rates of the income tax specified in an agreement entered into by the Central Government under section 90 of the Act, or an agreement notified by the Central Government under section 90A of the Act, as the case may be.

However under section 196D of the Act, no deduction of tax shall be made from income arising by way of capital gain to FIIs.

Further, as per section 206AA of the Act, any person entitled to receive any sum or income or amount, on which tax is deductible under Chapter XVIIIB (hereafter referred to as deductee), shall furnish his PAN to the person responsible for deducting such tax (hereafter referred to as deductor), failing which tax shall be deducted at the higher of the following rates, namely:

- (i) at the rate specified in the relevant provision of the Act; or
- (ii) at the rate or rates in force; or
- (iii) at the rate of twenty per cent.

E) Exemption from capital gains arising from transfer of bonds under section 54EC

The long-term capital gains arising from transfer of bonds (hereinafter referred to as original asset), shall be exempt from tax under section 54EC of the Act provided such gains are invested within six months from the date of transfer, in the bonds (hereinafter referred to as long-term specified asset) issued by any of the following:

- (a) National Highways Authority of India, which have been issued on or after 1 April, 2006,
- (b) Rural Electrification Corporation Limited issued on or after 1 April, 2006.

The amount of exemption would depend upon the extent of utilisation of the long-term capital gain on the original asset. However, where the long-term specified asset is transferred (including pledge of the long-term specified asset) or converted (otherwise than by transfer) into money, within a period of three years from the date of its acquisition, the amount of capital gain arising from the transfer of original asset not charged to tax shall be deemed to be income chargeable under the head “Capital gains” relating to long-term capital asset of the previous year in which the long-term specified asset is transferred or converted (otherwise than by transfer) into money.

However, investment limit in the specified assets mentioned above is upto Rs.50,00,000/- in a financial year.

F) Exemption from capital gains arising from transfer of bonds under section 54F

As per the provisions of section 54F of the Act, any long-term capital gains arising to Bondholder who is an individual or Hindu Undivided Family on transfer of such bonds, will be exempt from capital gains tax if the entire net sale consideration is utilized, within a period of one year before or two years after the date of transfer, in purchase of a new residential house, or for construction of residential house within three years from the date of transfer. If part of such net sale consideration is invested within the prescribed period in a residential house, then such gains would be chargeable to tax on a proportionate basis. The deduction as aforesaid will be subject to compliance of provisions contained in section 54F of the Act.

If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long-term capital gains in the year in which such residential house is transferred. Similarly, if the Bondholder purchases within a period of two years or constructs within a period of three years after the date of transfer of capital asset, another residential house (other than the new residential house referred above), then the amount of original capital gain exempted will be taxed as capital gains in the year in which the additional residential house is acquired.

3. Bonds held as Stock-in-Trade

In case the bonds are held as stock-in-trade, the income on transfer of bonds would be taxed as business income or loss in accordance with and subject to the provisions of the Act. However, as per section 2(14) (b) of the Act, income on transfer of bonds held by FIIs will be taxed only under the head ‘Capital gains’.

4. Surcharge & Cess

Surcharge will be levied @ 7% on domestic company and in case of every company, other than a domestic company @ 2% (if their total income exceeds rupees 1,00,00,000/- but does not exceeds Rs.10,00,00,000) In case income exceeds Rs.10,00,00,000/- surcharge on domestic company is levied @12% and other than domestic company @ 5%, In case of firms, co-operative societies, local authorities Individuals/HUFs/BOIs/AOPs and Artificial juridical persons surcharge is levied @ 12% (if their total income exceeds rupees 1,00,00,000/-).

During Q1 FY2016, agriculture and allied sectors grew 1.9% year-on-year and contributed 14.2% of GVA.

In the first half of FY 2016, general government expenditure witnessed an up-tick in two key social sectors—health and especially agriculture and rural development—both in real terms and as a share of GDP. For example, total real expenditure in agriculture and rural development increased by a substantial 9.9 percent, indicating that the government has responded to the stress in the rural farm sector.

The details of the emerging sectoral trends subsumed under the GDP growth of 7.2 percent in H1 2015-16 are as follows:

Agriculture and allied sectors: The production of cereals, pulses and oil seeds had declined during the last Rabi season which ended in June 2015. During the current Kharif season, the production of cereals and pulses again contracted by 1.8% and 1.1%, respectively, while oilseeds grew by 8.5%. Nonetheless, the livestock products, forestry and fisheries which together constitute more than one-third of the GVA of the agriculture and allied sectors grew by 6% each in Q1 and Q2 2015-16, providing support to raising rural incomes.

One of the imponderables to the economic outlook for India has been the dependence of agriculture on the monsoon rainfall with more than 68% of India's arable land under rain fed agriculture. As the rainfall data in the monsoon season was none too comforting, the agricultural outlook initially for the year was not sanguine. In the event, the actual outcome as per estimates of GDP for the second quarter (July-September) of 2015-16 of a 2.2% growth agriculture and allied sector was reassuring indicating the robustness of the sector. The robustness of the sector in part, owe to diversification process to non-crop agricultural activities and value addition thereon. This is evident from the fact that while the national accounts disaggregated data (available only annually) indicated an overall growth of above 2% in the Kharif seasons of the current as well as previous year, sectoral data on crop production shows an undulating trend in the two years which falls short of the production achieved in 2013-14.

Agricultural Credit

Effective agriculture credit is one of the key drivers of agricultural production. While the short term agriculture credit is required to ensure desired level of crop production leading to food security, long-term agriculture credit is crucial for capital formation and asset creation leading to sustainability and viability of both production and productivity. With the objective of making credit available to farmers, the GoI has been fixing targets for flow of credit to agriculture by the banking sector every year. Agriculture credit flow increased from ₹ 5,11,029 crore in 2011-12 to ₹ 7,30,765.61 crore (Prov.) in 2013-14 and ₹ 8,45,328.23 (Prov.) in 2014-15 and has consistently exceeded the target, thus indicative of the concerted efforts of GoI. For 2015-16, agriculture credit target has been enhanced to ₹ 8,50,000 crore. The details of targets and the achievements during the last four years is as follows:-

(Amount in crore)

Year	Target	Achievement
2011-12	4,75,000	5,11,029
2012-13	5,75,000	6,07,375
2013-14	7,00,000	7,30,765.61*
2014-15	8,00,000	8,45,328.23*

Rural Infrastructure & Development: An Overview

The Indian farmer has suffered not only due to restrictions on marketing and processing, but also due to poor infrastructure. The greatest challenge lies in reducing the transaction costs for farmers by providing them access to world-class physical infrastructure. The Plan outlay for 2015-16 of the Department of Rural Development is ₹ 71,642.00 crore. Key constituents of the Central Plan outlay are Special Programmes for Rural Development, Rural Employment, Rural Housing, Roads & Bridges, and Social Security and Welfare.

Special Programmes for Rural Development: The central outlay for the National Rural Livelihood Mission / Aajeevika for 2015-2016 is ₹ 2505.00 crore out of which ₹ 210.50. crore has been earmarked for North Eastern Region and Sikkim. Mahila

Kisan Sashaktikaran Pariyojana (MKSP) has been initiated as a sub-component of the NRLM to meet the specific needs of women farmers and achieve socio-economic and technical empowerment of the rural women farmers, predominantly small and marginal farmers.

OTHER RURAL DEVELOPMENT PROGRAMME:

The total plan outlay for 2015-2016 is ₹ 1040.00 crore which includes provision for NIRD (₹ 50.00 crore), CAPART (₹ 10.00 crore), Management Support to Rural Development programmes and strengthening of district planning process (₹ 130.00 crore), BPL Survey (350.00 crore), SPM RURBAN Mission (₹.300 crore) & Village Entrepreneurship Programme(₹.200.00 crore). Out of this, ₹ 103.00 crore have been kept separately for “North Eastern Region and Sikkim”.

The SPMRM was announced in the Budget of 2014-15 to ensure delivery of integrated project based infrastructure, development of economic activities and skill development in rural areas. The Mission Objective of the scheme is to improve quality of life / standard of living in Rurban clusters, to bridge the rural –urban divide and to reduce migration from rural to urban areas and eventually to facilitate reverse migration.

WAY FORWARD FOR RURAL INFRASTRUCTURE

The future challenge in developing rural infrastructure will go beyond drawing up inventories of infrastructure stocks and projecting investment needs based on past patterns. These challenges could pivot around tackling inefficiencies both in investments and service delivery. Apart from increasing the stock of infrastructure quantitatively, the quality of infrastructure services also needs to be emphasized. The present approach to rural infrastructure development in India, while forward looking with many synergies, is fundamentally divided into silos of various funding needs. Benefiting from the complementarities between various sectors and sub-sectors is possible only if systematic investments are prioritized, keeping in mind the comprehensive long-term infrastructure needs of the agricultural sector and rural India.

OUR BUSINESS

In this section any reference to “we”, “us”, “our” or “NABARD” refers to National Bank for Agriculture and Rural Development. Unless stated otherwise, the financial data in this section is according to our financial information prepared in accordance with the requirements of the SEBI Debt Regulations set forth elsewhere in the Prospectus.

The following information should be read together with the more detailed financial and other information included in the Prospectus, including the information contained in the section titled “Risk Factors” on page 13 of this Prospectus.

Overview

NABARD is an apex development institution in India, having its headquarters in Mumbai (Maharashtra). NABARD has a mandate under the NABARD Act to facilitate credit and other facilities for the promotion and development of agriculture, small scale industries, cottage and village industries, handicrafts and other rural crafts and other allied economic activities in rural areas in India with a view to promoting integrated rural development. It was established on July 12, 1982 by a special Act of Parliament and its main focus has since been the upliftment and development of rural India by increasing the credit flow for elevation of agriculture and rural non-farm sector. It completed 34 years on January 1, 2016. It has been entrusted with matters concerning policy, planning and operations in the field of credit for agriculture and other economic activities in rural areas in India. As on March 31, 2015, NABARD operates throughout the country through its 31 Regional Offices, a cell at Srinagar and Training establishments at Lucknow, Bolpur and Mangalore. It also has 400 District Development Offices across the country as of March 31, 2015. It also has the mandate to support all other allied economic activities in rural areas, promote integrated and sustainable rural development and secure prosperity of rural areas.

Genesis and Mission

NABARD was a product of CRAFTCARD lead by the Chairman Mr B. Sivaraman, a former member of Planning Commission of India, GoI. The Sivaraman Committee was constituted by the RBI on March 30, 1979 at the instance of the GoI, to review the arrangements for institutional credit for agricultural and rural development. This committee, in its interim report, submitted on November 28, 1979, felt the need for a new organisational structure for providing undivided attention, forceful direction and pointed focus to the credit problems arising out of integrated rural development and recommended the formation of National Bank for Agriculture and Rural Development. The Parliament, through Act, 61 of 1981, approved the setting up of NABARD. Eventually the institution came into existence on July 12, 1982 by transferring the agricultural credit functions of RBI and refinance functions of the then ARDC. NABARD was dedicated to the service of the nation by the late Prime Minister Smt. Indira Gandhi on November 5, 1982.

NABARD was set up with an initial capital of ₹ 100 crores. Consequent to the revision in the composition of share capital between GoI and RBI, the share capital as on March 31, 2015, stood at ₹ 5,000 crores with GoI holding ₹ 4,980 crores (99.60%) and RBI ₹ 20.00 crores (0.40%).

NABARD functions with the mission to “Promote sustainable and equitable agriculture and rural prosperity through effective credit support, related services, institution development and other innovative initiatives.”

Ownership of NABARD

Initially, RBI held 72.5% of share capital in NABARD amounting to ₹ 1,450 crores. The remaining shareholding of ₹ 550 crore was with the GoI. The Union Cabinet in May 2008 approved the RBI's proposal to transfer its shareholding in NABARD to the GoI. Accordingly, the GoI issued a notification on September 16, 2010 prescribing the proportion of subscription/ownership of GoI and RBI in NABARD as 99% and 1% respectively. In terms of RBI circular dated October 14, 2010, RBI had divested its stake amounting to ₹ 1,430 crores in NABARD on October 13, 2010. With this, the RBI's holding in NABARD came down to 1% of shareholding in NABARD. In September 2013, GoI gave an amount of ₹ 700 crores towards share capital. Consequent to this the shareholding of GoI and RBI in the share capital of NABARD as at the date of this Prospectus is at 99.60:0.40, respectively.

Strengths

Continued support from GoI and key public policy role in India's agriculture sector

NABARD is the apex financing institution to augment credit flow to the agricultural and rural sectors. The institution plays a developmental role in strengthening the rural financial institutions. The agency extends refinance support to SCARDBs, STCBs, RRBs, commercial banks, and other financial institutions approved by RBI. Given the increasing role played by NBFCs in agricultural and rural credit, NABARD also extends refinance facility to this sector. It also provides co-finance with commercial banks to viable projects.

Over the past few years, the role and scope of NABARD has been enlarged significantly by GoI. NABARD has been entrusted with the management of various development funds including RIDF, Watershed Development Fund, and Tribal Development Fund (TDF). Furthermore, NABARD also provides support to RRBs and CCBs for implementation of core banking solution, and facilitates recapitalization of RRBs falling short of the minimum CAR requirement of 9%. In addition, in its report on financial inclusion, the C Rangarajan Committee has identified NABARD as a key agency for implementing its various recommendations to bring about rural prosperity. Acting on the various recommendations of this report, GoI constituted two funds, Financial Inclusion Fund (FIF) and Financial Inclusion Technology Fund (FITF) with a corpus of ₹5,000 crores each to be managed by NABARD to promote financial inclusion. In Union Budget 2008-2009, GoI announced creation of Short Term Cooperative Rural Credit Fund (STCRC) with corpus of ₹5,000 crores to be contributed by scheduled commercial banks not achieving their priority sector lending obligations. The corpus has since been augmented several times, and was retained at ₹4,000 crores for 2015-2016. In the Union Budget 2011-2012, GoI announced setting up of a short-term RRB refinance fund that was to be administered by NABARD. The fund had an initial corpus of ₹1,000 crores and enhanced the capacity of RRBs to disburse short-term crop loans to small and marginal farmers.

Strong Capitalisation

NABARD's strong capitalisation is marked by a high tier-I capital adequacy ratio, large tier-I capital base, and low asset-related risks. The institution's capital position is also supported by steady accruals to net worth, which, in the absence of dividend pay-outs, are retained entirely. NABARD's regulatory tier-I CRAR and overall CRAR were 15.83% and 16.91%, respectively, as at March 31, 2015, 15.48% and 16.61%, respectively, as at March 31, 2014, 17.33% and 18.24%, respectively, as at March 31, 2013.

NABARD's advances to State Governments and other advances guaranteed by State Governments carry a risk weight of 0% for credit risk in the regulatory computation of its tier-I CRAR. However, if a 100% risk weight is attached to State Government guaranteed advances, and if the ₹16,070 crores of National Rural Credit (Long-Term Operations) Fund and National Rural Credit (Stabilization) Fund, (which are not liable to be repaid) are treated as capital (leading to a tier-I capital base of ₹24,680.90 crores and Tier II Capital of ₹1,618.74 crores), the institution's adjusted tier-I CRAR continues to be comfortable, around 15.83% as at March 31, 2015 and as on September 30, 2015 it stood at 16.39%.

Robust Asset Protection Mechanisms

NABARD has robust asset protection mechanisms that help it manage exposure to institutions with inherently weak creditworthiness, which constitute a large proportion of its borrowers. The institution also has a strong net worth coverage of NPAs, because of its large capital base and low NPAs, which are supported by the robust asset protection mechanisms available to it. NABARD's loan book has a stable repayment track record and the institution has rarely invoked the guarantees or debit facilities available to it. In cases of default, the institution has restructured or rescheduled loans to enable borrowers to make repayments on a staggered basis. NABARD restructured loans of ₹2.10 crores in 2014-15, as against nil in 2013-14, ₹4.22 crores in 2012-13, ₹788.25 crores in 2011-12 and ₹22.10 crores in 2010-11. For the co-financing facility extended by the institution for development of sunrise industries, strong credit appraisal and monitoring mechanisms are followed in conjunction with the co-financing partners. These factors have helped NABARD maintain low NPAs over the years. As on September 30, 2015, the gross and net NPA ratios were 0.0497% and 0.0075%, respectively, the gross and net NPA ratios were 0.04985% and 0.0092%, respectively, as on March 31, 2015 and 0.04326% and 0.0089%, respectively, as on March 31, 2014.

Adequate Borrowing Profile

NABARD's resource profile is marked by regular government support for raising borrowings. Furthermore, in the domestic debt market, NABARD's paper is accepted as a benchmark in its category and has wide acceptability among the investors comprising mutual funds, pension funds, and insurance companies.

NABARD has been recognised by GoI as the nodal agency to mobilise RIDF deposits from commercial banks. These deposits form a significant portion of its borrowings, at 37.16% as on September 30, 2015 at 38.97% on March 31, 2015 (41.38% as on March 31, 2014). Additionally, since 2008-09, GoI has been supporting NABARD's resource profile by creating STRRB and STCRC. These two funds together constituted 37.78% of the total borrowings as on September 30, 2015, 39.14% as on March 31, 2015, 39.47% as at March 31, 2014. NABARD has deposits of ₹1,550 crores as on September 30, 2015 and 2014-15 and 2014-15 for lending towards creation of warehousing facilities in the country. During the year 2014-15, a long term rural credit fund (LTRCF) has been created with a corpus of ₹5,000 crores and increased by ₹15,000 crores during 2015-16, for meeting the investment credit needs of the rural economy.

Strategies

As India's apex financial institution for agriculture and rural development, NABARD is geared to deliver value to the rural economy through:

Fulfilling the credit needs of India's rural economy

NABARD meets the credit requirements of farmers at the ground level in line with the policies of GoI. Through increasing and expanding support to rural financial institutions and NBFC's by way of refinance support and direct lending support, NABARD aims at increasing agricultural production, raising farm productivity, improving access to markets through reforms and providing better facilities for storage of produce. Adopting sector related policies and activities, contributing to better output and income from farming, farm-related and off-farm activities in rural India shall be the ground rule for NABARD.

Asset Creation for Rural Economy

NABARD increases its refinance support for various purposes such as farm investments, allied activities, small and micro-enterprises, agro-processing, non-conventional energy, self-help groups and rural housing for to ensure a steady flow of long-term credit to the farm and non-farm sectors with a target of creating assets and capital that are critical for sustained agricultural growth.

Financing Short Term Business Operations

To pursue an overall agriculture growth, NABARD adopts enabling policies for refinancing production, procurement and marketing activities of the farmers with special relaxation for priority regions like NE and sectors like handlooms. Strengthening rural financial institutions through development and providing technology support to these institutions will lead to a robust and effective rural financial market.

Agri-Commodity Value Chains, Opportunities for Small Farmers, Value Addition and Linkages, Support to Producer Organisations

A special emphasis shall be laid on integrating producers, especially with small land holdings, into supply chains and integrated market systems. Support services will be provided for developing agri-commodity chains, producer organisations, establishment of warehouses and providing forward and backward linkages.

Micro-Finance Initiatives and Financial Inclusion

The SHG Bank Linkage Programme will be expanded with a view to cover all eligible poor rural households, prioritizing resource-poor States, providing livelihood opportunities to SHG members and covering the hitherto unreached areas in close co-ordination with National Rural Livelihood Mission. Efforts are being made for the convergence of SHG-BLP with the financial inclusion initiative of the GoI and RBI, in addition to other government programmes, including Prime Minister's Jan Dhan Yojna.

Mitigating Risks in Agriculture and Addressing Distress

More interventions shall be framed to ensure timely and adequate relief from production, price, input and technology risks faced by the farmers. Provision of pre-weather alerts, weather report on mobiles, covering of all farmers under insurance schemes and credit-related measures in the event of natural calamity shall continue to the thrust area. Preparing implementable action plans to address agrarian distress in totality shall be another challenging area for NABARD.

Sustainable Agriculture, Climate Change and Promoting Natural Resource Management

In accordance with one of the main agenda of development of sustainable agriculture, NABARD will promote and support watershed and livelihood based programmes, natural resource management programmes, transfer of agriculture technology through farmers clubs, development of tribal farmers by tribal development programmes, enhancing resilience of agriculture against climate change, promoting gender equity and social empowerment and financing of producers organisations.

RIDF and Rural Infrastructure

NABARD channelises the financial resources under RIDF to State Governments to develop a robust and comprehensive physical infrastructure as a core need of agriculture and rural development.

Research Development and Consultancy

To meaningfully link development and credit planning, NABARD has been preparing holistic potential-linked credit plans through its more than 400 District Development Offices across the country. The focus is on credit planning, monitoring, co-ordination between various developmental and promotional activities in each district of the country. Financial support under

Research and Development Fund will continue for promotion of applied research, projects, studies, organisations, sponsoring chairs in universities and conducting seminars and workshops.

The activities include among others, ploughing and preparing land for sowing, weeding, and transplantation where necessary, acquiring and applying inputs such as seeds, fertilizers and labour for all operations in the fields for raising and harvesting the crops. This is effected through a concessional rate of interest being given to State Co-operative Banks and RRBs by way of sanction of credit limits. Each withdrawal against the sanctioned credit limit is repayable within 12 months. Funds under this are distributed through the Short-Term Co-operative Rural Credit Refinance Fund and Short-Term RRB refinance Funds which under the 2015/16 Union Budget of GoI as allocated ` 54,000 crores and ` 16,000 crores, respectively, during 2015-16. - (d) *Refinance for Marketing of Crops:* In order to enable the farmers on the farm to produce with a view to having the opportunity to maximize their sale price, short term refinance from NABARD is available to STCBs on behalf of DCCBs. Advances are also permitted against pledge of agricultural produce or outright purchase of agricultural produce of cultivators by processing and marketing societies. Under this facility, 100% refinance is available against loans extended to societies or cultivators by DCCBs.

Limit are sanctioned and aggregated to RRBs and STCBs in respect of eligible DCCBs.

Medium Term Loans

- (g) *Conversion Assistance following a Natural Calamity:* NABARD provides medium term credit limits to STCBs (on behalf of DCCBs) and RRBs for conversion of short term agricultural loans to medium term loans and rescheduling of existing medium term loans due to crop damage as a result of natural calamities.

Long Term Loans

NABARD extends refinance support to RRBs, commercial banks and cooperative banks for their long-term lending, with the repayment period ranging from 3 to 15 years. These loans are targeted at creating assets and capital that are critical for sustained agricultural growth. Refinance for various purposes, such as farm investments, allied activities, small and micro-enterprises, agro-processing, organic farming, nonconventional energy, self-help groups and rural housing, are given to ensure a steady flow of long-term credit to the farm and non-farm sectors. There is also a long-term refinance facility where credit is provided for 3 to 15 years which is intended to create income generating assets in (i) the farm sector such as minor irrigation, farm mechanisation, land development, soil conservation, dairy, sheep or goat rearing, poultry, piggery, plantation, horticulture, forestry, fishery, storage and market yards, bio-gas and other alternate sources of energy, sericulture and (ii) the non-farm sector such as artisans, small scale industries, handicrafts, handlooms, power looms and for activities of voluntary agencies and self help groups working among the rural poor. The institutions eligible for refinance are SCARDBs, RRBs, STCBs, commercial banks, ADFCs, PUCBs, NEDFC and NBFCs. Amount outstanding under this business operation as on September 30, 2015 is ` 72,530.31 crores.

Housing Loans

As housing in the rural areas, both agriculturist and non-agriculturists, combines the business as well as dwelling needs and thereby leads to overall rural development, NABARD extends refinance (investment credit) to eligible banks.

Renewable Energy Schemes

The Ministry of New and Renewable Energy has launched a capital cum interest subsidy scheme for creation of off-grid, decentralised solar powered energy harvesting devices through application of photo voltaic technology for the purpose of lighting, heating, etc. at the level of domestic and mini commercial applications. NABARD is the nodal agency for giving feasibility and refinance for eligible projects. This subsidy-cum-refinance scheme under the Jawaharlal Nehru National Solar Mission was launched by the Ministry of New and Renewable Energy, GoI in November 2010 to encourage the use of solar energy and help replace non-renewable energy. The scheme was revised and made into a capital subsidy scheme for solar

lighting and small-capacity photo-voltaic systems from March 15, 2012. In 2014–15 up to 31 March 2015, a subsidy of ` 2.42 crores was released for 2953 units.

RIDF

NABARD has been channelizing the shortfall in the mandatory share of priority sector lending by commercial banks to the Rural Infrastructure Development Fund, instituted in 1995–96. Though the fund initially focused on incomplete irrigation, flood protection and watershed management projects, funding for rural infrastructure became more broad-based through the years. The RIDF, inter alia, covers 34 activities related to rural infrastructure development. With allocations in every Union Budget since its inception, RIDF has evolved as a major and popular source of finance to state governments. This long-term partnership between NABARD and the state governments has strengthened over the last two decades.

With its experience of managing the RIDF for nearly 20 years, NABARD has gathered significant insights in matters related to rural infrastructure. As an indirect outcome, NABARD has developed internal capabilities in financing and facilitating the creation of rural infrastructure and has expanded its contribution to this domain through various other initiatives as well. Amount outstanding under this business operation as on September 30, 2015 is ` 85,388.30 crores.

Overview of Direct Lending

Direct lending to the rural sector is effected by NABARD through the following mechanisms:

- (i) *NABARD Infrastructure Development Assistance (NIDA)*: NIDA is a line of credit extended to state governments and state-owned entities (institutions and corporations) to participate in the creation (or funding) of rural infrastructure projects on both on-budget and off-budget items outside the ambit of RIDF borrowing. NIDA is available on more flexible interest terms than the RIDF. Since the inception of NIDA (2010–11), 35 projects have been sanctioned for purposes such as warehousing, power transmission, cyclone-damaged power restoration, roads, irrigation and sewerage. Andhra Pradesh, Bihar, Chattisgarh, Goa, Gujarat, Haryana, Karnataka, Rajasthan, Maharashtra, Punjab, Tamil Nadu, Uttarakhand, Madhya Pradesh and West Bengal are the major states funded through NIDA. Amount outstanding under this business operation as on September 30, 2015 is ` 2,659.83 crores.
- (ii) *Producer Funds*
 - a. *Producers Organization Development Fund*: The Producers Organization Development Fund has been set up on April 1, 2011, with an initial corpus of ` 50 crores. Any registered producers organization such as producers companies, producers co-operatives, registered farmer federations, mutually aided cooperative society, industrial co-operative societies, other registered federations or PACS set up by producers are eligible under the fund. Credit support is provided in the form of grant, loans, or a combination of these is also available for capacity building and market interventions. The fund was established to tackle the issues of lack of availability of timely credit, capacity building of producers and strengthening of the producers organizations and market participant links. Amount outstanding under this business operation as on September 30, 2015 is ` 3 33.31 crores.
 - b. *Producers Organization Development and Upliftment Corpus (PRODUCE) Fund*: This fund has a ` 200 crore corpus created by the GoI in NABARD to build 2000 farmer producer organizations.
- (iii) *Credit Facilities to Marketing Federations*: Marketing federations and cooperatives are playing a very important role in agribusiness and value and supply chain management of the various agricultural commodities. Farmers, producer organizations and primary societies depend upon these institutions for marketing of their produce and for value added services like input supply, value addition and storage facilities. The marketing operations by these federations and cooperatives require seasonal and timely short term credit facility to support their day to day operations. State and Central Government Agricultural Marketing Federations, companies, dairy co-operatives and federations, agriculture marketing co-operatives and federations, subject to meeting certain eligibility criteria, may utilize less than 12 month short term credit facility to meet working capital requirements. It has to be repaid at the end of 12th month and can be used for procuring, processing and marketing of agricultural commodities and milk and supply of agricultural inputs including animal feed. Rate of interest, security and fees will be decided by NABARD. Amount outstanding under this business operation as on September 30, 2015 is ` 3,377.99 crores.

NABARD also will contribute to financial inclusion, rural development, social security, infrastructure funding, skilling India and "Digital India" as part of its development role.

The developmental role of NABARD is implemented in the following ways:

Institutional Development of Co-Operatives

The Institutional Development has initiated programmes and initiatives for strengthening of co-operatives since 1982. Support is being provided to rural credit co-operatives structure to attain our goal for evolving a sustainable rural financial system to enhance ground level credit flow to farmers and others in rural areas by NABARD. Assist GoI in policy matters relating to rural co-operatives. These include monitoring the viability of the co-operative banks through systematic data, assisting GoI in taking remedial measures to improve the health of weak banks, help co-operative banks in streamlining procedures, upgrading technology and human resource development, professionalise executives of co-operatives, financially support training institutes of co-operative banks, provide financial assistance to co-operative banks for building improved management information system, computerisation of operations, development of human resources, assist on policy notes for GoI, RBI, Parliamentary Committees and various other agencies, provision of support to co-operatives under CDF for infrastructure development, training institutions for training of co-operative banks and PACS personnel and organising periodical Meets of Registrars of Co-operative Societies and heads of STCBs and SLDBs.

Farm Sector Development Department

FSDD's core function is implementation of various farm sector initiatives aimed at conservation and management of natural resources, accelerating ground level credit flow by rural financial institutions, incremental agricultural production and productivity, generating rural employment and raising the standard of living of rural poor through credit and grant. The implementation of these programmes evolved over a period of time through various policy initiatives is the responsibility of FSDD. Dealing with the operational issues emerging while implementing, monitoring the programmes and providing feedback for policy framing and improvement is a part of the task assigned to FSDD.

Off Farm Sector Development

Promotion of Rural Non-Farm Sector assumes significance in the context of reducing over dependence on agriculture of our rural population and to provide alternate livelihood options. It also helps in arresting large-scale migration of small and marginal farmers and agricultural labourers to urban areas in search of livelihood opportunities on account of unemployment/disguised employment in the agriculture sector.

NABARD, according to its mandate, had evolved several refinance and promotional schemes for development of Rural Non-Farm Sector over the years and has been making constant efforts to broad base and refine / rationalise the schemes in response to field level needs. The focus has been on greater credit flow, credit to the unreached and provision of linkages for small, cottage and village industries, handloom, handicrafts and other rural crafts and service sector in the decentralised sector in the rural areas.

Building an entrepreneurial culture and necessary skills among the rural youth and women has also been a priority area for NABARD. Developing markets for the rural non-farm sector had been another area where NABARD had taken many initiatives. NABARD has also been actively involved in promoting innovations in rural areas in farm and non-farm sectors by creating a separate fund for this purpose.

Micro Credit Innovations

The 'EShakti' pilot project launched by NABARD for digitisation of SHGs initially in the two districts of Ramgarh (Jharkhand) and Dhule (Maharashtra) aims to address the issue of reducing drudgery of manual bookkeeping, increase bankers' comfort in credit linkage of SHGs in view up-to-date credible data available on website www.eshakti.nabard.org, reducing scope of multiplicity of membership and lending to SHG members, convergence with other GoI benefits to members with Aadhaar enabled identity. EShakti is an on-line system for writing of books of accounts of SHGs and other activities through an "App" loaded on an android based mobiles or tablets with mobile support and texting alert features to members on their updates and capable to generate various financial MIS reports.

PACS Development Cell Scheme

NABARD extended grant assistance to set up PACS Development Cell (PDC) in co-operative banks so as to help PACS to develop and grow their business. During 2014-15, grant assistance was sanctioned to 10 PDCs have been sanctioned taking the cumulative number to 96 in various States and cumulative disbursement of ` 4.30 crores as on March 31, 2015.

Developmental Action Plan

In order to strengthen co-operative credit institutions both for short term and long term structures as viable units on a sustainable basis, NABARD had introduced a mechanism of DAP/MoU aiming at institution specific measures in 1994-95. The performance obligations arising out of DAP formed the basis of the Memorandum of Understanding (MoU) between stake holders. While the State level MoUs are executed among the apex banks, State Government and NABARD, district-level MoUs are entered into between the apex banks and district level DCCBs/PCARDBs. The co-operative banks, throughout the country had prepared the base DAPs and executed the base level MoUs for 5 years terminating March 2000. The second round of DAPs, and MoUs covered the period 2000-01 to 2002-03 which was extended by one more year i.e. up to March 2004. Since then the base-level DAP/MoU covered a larger period of 3 to 5 years. The third phase of DAP/MoU started from the year 2004-05 for a period of 3 years. During the third phase of DAP/MoU covering the period 2004-05 and 2006-07 for the first time PACS were introduced to planning process.

Based on the feedback received from the constituent co-operative banks, it was decided to extend the exercise to its fourth phase covering the period from 2007 to 2012 so as to co-terminate with XIth five-year plan.

The mechanism of DAP/MoU has helped in building appreciation and awareness for strategic planning facilitating, in turn, sustainable viability at all levels. The feedback received indicates that there was positive impact on the performance of banks as a result of introduction of DAP/MoU through reduction of cost of management and cost of resources. The DAP planning

process, as an internal strategy for corporate planning, had facilitated in creating an awareness in the cooperative banking structure and RRBs about the need for strategic planning for corporate success.

Co-operative Revival and Reforms

Rural co-operative credit institutions have played a large role in providing institutional credit to the agricultural and rural sectors in the past. Typically, these credit institutions have been part of two distinct structures, commonly known as the STCCS and the LTCCS in each state. The STCCS, comprising PACS at the village level, DCCBs at the intermediate level, and the STCBs at the apex level, primarily provides short term crop loans and other working capital loans to farmers and rural artisans, although over the last few years, it has also been providing longer duration loans for investments in the rural sector. The LTCCS, comprising SCARDB at the state level and primary (P) CARDs or branches of SCARDB at the decentralised district or block level, has been providing typically medium and long term loans for making investments in agriculture, rural industries, and lately housing.

Monitoring of Progress

RFIs have a critical role in dispensing credit to agriculture and allied sector. A strong and viable rural institutional credit framework is vital for the growth of rural economy. Strengthening of the institutions, especially the cooperative credit structure has been an area of focussed attention of NABARD. The health of these RFIs is being regularly monitored through various prescribed management systems by undertaking analysis of key business and financial parameters and time series data for making them sustainable.

Core Business of Department

The core activities of the Department are to carry forward the agenda of financial inclusion of the excluded population at the national level in accordance with the framework described by the Report of the Committee on Financial Inclusion in general and operationalising the FIF and FITF, in particular. The implementation is under the guidance of the two advisory boards set up for FIF and FITF respectively.

Core Banking Solution (CBS) to Co-operative Banks

In one of the biggest initiatives towards institution building, NABARD has facilitated the process of bringing the co-operative sector onto core banking solution platform. A total of 201 State and Central Co-operative Banks with 6,953 branches from 16 states of the country, such as Punjab, Haryana, Gujarat, Maharashtra, Uttar Pradesh, Chhattisgarh, Madhya Pradesh, Bihar, Karnataka, Tamil Nadu, Kerala, Uttarakhand, Sikkim, Himachal Pradesh, Jammu & Kashmir, Arunachal Pradesh, Chandigarh, Puducherry and Andaman & Nicobar joined the “NABARD initiated Project for CBS in Co-operatives”. Two vendors, Tata Consultancy Services and Wipro, have implemented the ambitious project across the country. All these banks with 6,953 branches are fully on CBS. This includes 122 new branches which were directly opened on CBS platform. Tamil Nadu Industrial Cooperative Bank has been taken on-board for roll-out of CBS under the project.

The model followed in the initiative is Application Service Provider model using the concept of cloud computing. Now these century old banks have started functioning in the CBS environment with the technological platform of the Commercial Banks and Regional Rural Banks and are comparable with these institutions in providing similar kind of services in more rural parts of the country.

In addition, NABARD has also been conducting periodic inspections of state level cooperative institutions such as SCARDBs, apex weavers societies and marketing federations on a voluntary basis. The purpose of supervision is to protect present and future depositors interests, ensure business is conducted by banks complies with Indian laws and all regulations issued by NABARD, RBI or GoI, check examine the financial soundness of NABARDs and propose ways and means to strengthen the institutions to enable them to play more efficient role in assisting rural credit. This is implemented by NABARD through on-site inspections, off-site surveillance and monitoring, supplementary appraisals if required. STCBs and RRBs are required to comply with credit monitoring arrangement guidelines issued by RBI or NABARD from time to time. In addition, a Board of Supervision (for SCBs, CCBs and RRBs) has been constituted by NABARD under Section 13(3) of NABARD Act, 1981 as an internal committee to the Board of NABARD. For further details see section titled “*Regulations and Policies*” on page 72 of this Prospectus.

FINANCING

NABARD receives its funding by raising funds through market borrowings and budgetary allocation made by GoI from the priority sector lending shortfalls of commercial banks.

To meet the growing demand for credit, NABARD adds to its resources via market borrowings, such as issuing corporate bonds, Bhavishya Nirman Bonds, NABARD Rural Bonds, capital gain bonds, commercial papers, certificates of deposits and term money borrowings.

RISK MANAGEMENT

The Bill states that the share of capital currently held by RBI, valued at ₹ 20 crore, shall be transferred to the central government. The above amount equates to a 0.4% of the share. The Bill further contemplates to raise the authorized capital of NABARD to ₹. 20,000 crore from ₹ 5,000 crore. The Bill requires NABARD to establish a fund to be known as the National Rural Credit (Short Term Operations) Fund. This fund is to include sums of money that may be contributed by the GoI, state governments, RBI and the Board. The Bill merges the posts of the Chairman and the Managing Director of NABARD. It changes the definition of “co-operative society” and “central co-operative bank”. It introduces the terms “micro enterprise”, “small enterprise” and “medium enterprise” as defined in the Micro, Small and Medium Enterprises Development Act, 2006.

The Recovery of Debts due to Banks and Financial Institutions Act, 1993

The Recovery of Debts due to Banks and Financial Institutions Act, 1993 (the “DRT Act”) provides for establishment of the Debt Recovery Tribunals (the “DRTs”) for expeditious adjudication and recovery of debts due to banks and financial institutions. The DRT Act lays down the procedure for making application to the DRTs, powers of the DRTs and modes of recovery of debts determined by DRTs. These include attachment and sale of movable and immovable property of the defendant, arrest of the defendant and appointment of receiver for management of the movable or immovable properties of the defendant.

The DRT Act also provides that a bank or financial institution having a claim to recover its debt, may join an ongoing proceeding filed by some other bank or financial institution, against its debtor, at any stage of the proceedings before the final order is passed, by making an application to the DRT.

The Prevention of Money Laundering Act, 2002

The Prevention of Money Laundering Act, 2002 (the “PMLA”) was enacted to prevent money laundering and to provide for confiscation of property derived from, and involved in, money laundering. In terms of the PMLA, every financial institution, is required to maintain record of all transactions of a specified nature and value and verify and maintain the records of the identity of all its clients, in such a manner as may be prescribed. The PMLA also provides for power of summons, searches and seizures to the authorities under the PMLA.

The Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002

The Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (the “SARFAESI Act”) regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution may sell financial assets to an asset reconstruction company provided the asset is a non-performing asset. These assets are to be sold on a “without recourse” basis only. A securitization company may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower, by change in, or take over of, the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures.

Additionally, under the provisions of the SARFAESI Act, any securitisation company or reconstruction company may act as an agent for any bank or financial institution for the purpose of recovering its dues from the borrower on payment of such fee or charges as may be mutually agreed between the parties.

Regulations relating to Knowing the Customer and Anti-Money Laundering

The RBI has issued guidelines for identification of depositors and has advised banks and financial institutions to put in place systems and procedures to control financial frauds, identify money laundering and suspicious activities, and monitor high value cash transactions. The RBI has also advised financial institutions and banks to be vigilant whilst opening accounts for new customers to prevent misuse of the financing system for perpetration of frauds.

The RBI has prescribed know your customer (KYC) and anti-money laundering procedures (AML) combating financing of terrorism and obligation of banks under the Prevention of Money Laundering Act, 2002. Banks and financial institutions are required to have a customer acceptance policy laying down explicit criteria for acceptance of customers and defining risk parameters. A profile of the customers must be prepared based on risk categorisation. Banks and financial institutions have been advised to apply enhanced due diligence for high-risk customers. The guidelines provide that banks must undertake customer identification procedures while establishing a banking relationship or carrying out a financial transaction or when NABARD has a doubt about the authenticity or the adequacy of the previously obtained customer identification data. Banks and financial institutions must obtain sufficient information necessary to establish the identity of each new customer and the purpose of the intended banking relationship. Banks and financial institutions must also monitor transactions depending on the account's risk sensitivity.

In addition to keeping customer information confidential banks and financial institutions must ensure that only information relevant to the perceived risk is collected and that the same is not intrusive in nature. Apart from addressing this concern the fresh guidelines set out in detail the framework to be adopted by banks and financial institutions as regards their customer dealings. The concerns remain substantially the same and are directed towards prevention of financial frauds and money laundering transactions.

Exposure Norms for Financial Institutions

The RBI has provided for exposure norms for financial institutions ("**Exposure Norms**") consolidated in the Master Circular No. 1 DBR.FID.FIC.No.4 / 01.02.00 / 2015-16 dated July 1, 2015 to provide a detailed guidance to all-India term-lending and refinancing institutions in the matter of exposure norms. The Exposure Norms are also applicable to the refinancing institutions (viz., NABARD, NHB and SIDBI) but in view of the refinance operations being the core function of these institutions, their refinance portfolio is not subject to these exposure norms. However, from the prudential perspective, the refinancing institutions have to evolve their own credit exposure limits, with the approval of their Board, even in respect of their refinancing portfolio. Such limits could, inter alia, be related to the capital funds / regulatory capital of the institution. Any relaxation / deviation from such limits, if permitted, should be only with the prior approval of the Board.

The credit exposure to single borrowers shall not exceed 15% of capital funds of the FI. However, the exposure may exceed by additional five percentage points (i.e., up to 20%) provided the additional credit exposure is on account of infrastructure projects. FIs may, in exceptional circumstances, with the approval of their Boards, consider enhancement of the exposure to a borrower up to a further 5% of capital funds (i.e., 25% of capital funds for infrastructure projects and 20 percent for other projects). The credit exposure to the borrowers belonging to a group shall not exceed 40% of capital funds of the FI. However, the exposure may exceed by additional ten percentage points (i.e., up to 50%) provided the additional credit exposure is on account of infrastructure projects. FIs may, in exceptional circumstances, with the approval of their Boards, consider enhancement of the exposure to a borrower up to a further 5% of capital funds. While computing the extent of exposures to a borrower / borrower group for assessing compliance vis-a-vis the single borrower limit / group borrower limit, exposures where principal and interest are fully guaranteed by the GoI may be excluded.

Prudential Norms for Classification, Valuation and Operation of Investment Portfolio by Financial Institutions

RBI pursuant to Master Circular No. DBR.No.FID.FIC.3 / 01.02.00 / 2015-16 dated July 1, 2015 provides for a consolidated set of guidelines on Classification, Valuation and Operation of Investment Portfolio to all-India term-lending and refinancing institutions. The entire investment portfolio of the financial investment will be classified under three categories viz. 'Held to Maturity' ("**HTM**"), 'Available for Sale' ("**AFS**") and 'Held for Trading' ("**HFT**"). The securities acquired by the financial institutions with the intention to hold them till maturity will be classified under HTM. The securities acquired by the financial institutions with the intention to trade by taking advantage of the short-term price / interest rate movements will be classified under HFT. The securities, which do not fall within the above two categories, will be classified under AFS. In keeping with the international norms, only debt securities are to be classified under the HTM category. The investments included under HTM should not exceed 25% of the total investments.

For computing the ceiling of 25% for the HTM category, the following type of investments should be excluded from the total investments and 25% of the balance amount would constitute the ceiling :

1. Equity held in subsidiaries / joint ventures;
2. Bonds / debentures and preference shares meeting the prescribed criteria and treated in the nature of advance;
3. Other investments (equity shares) in the nature of advance which may be held in the AFS category.

The financial institutions will have the freedom to decide on the extent of holdings under AFS and HFT categories. This will be decided by them after considering various aspects such as basis of intent, trading strategies, risk management capabilities, tax planning, manpower skills, capital position. Investments classified under HTM category need not be marked to market and will be carried at acquisition cost unless it is more than the face value, in which case the premium should be amortised

over the period remaining to maturity. The individual scrips in the AFS category will be marked to market at the year-end or at more frequent intervals. The net depreciation under each classification mentioned below should be recognised and fully provided for, the net appreciation under these classifications should be ignored. The book value of the individual securities would not undergo any change after the revaluation.

Resource Raising Norms for Financial Institutions (“RR Norms”)

RBI Master Circular No. DBR.No.FID.FIC.1 / 01.02.00 / 2015-16 dated July 1, 2015 consolidates provisions relating to short-term and long-term resource requirements of financial institutions so as to enable the financial institutions to cater to sectoral needs of credit linked to the operations, purpose and objectives with which the financial institutions were set up in accordance with their respective statutes. This circular also aims at providing level-playing field, by bringing broad convergence in regulatory norms among financial institutions with regard to issue of bonds by them. The ‘umbrella limit’ at present consists of five instruments viz., term deposits, term money borrowings, certificates of deposits (CDs), commercial papers (CPs) and inter-corporate deposits (ICDs). The aggregate borrowings through these specified instruments should not at any time exceed 100% of net owned funds (NOF) of the FI concerned in accordance with its latest audited balance sheet or as approved by RBI for individual financial institutions. The outstanding of total resources mobilised at any point of time by an FI, including the funds mobilised under the ‘umbrella limit’, as prescribed by the Reserve Bank, should not exceed 10 times its net owned funds as per its latest audited balance sheet or as approved by RBI for individual financial institutions.

Further, in accordance with the RR Norms, financial institutions are not required to seek issue-wise prior approval / registration from the RBI for raising resources by way of issue of bonds, whether by public issue or through private placement, subject to the fulfillment of the following conditions :

1. The minimum maturity of the bond should be 3 years;
2. In respect of bonds having call / put or both options, the same should not be exercisable before the expiry of one year from the date of issue of bonds;
3. No ‘Exit’ option on the bonds should be offered before the end of one year, from the date of issue.

Disclosure Norms for Financial Institutions

Pursuant to the Disclosure Norms for Financial Institutions issued in March 2001 (as updated till July 2015 by Master Circular No. DBR.No.FID.FIC.2 / 01.02.00 / 2015-16) RBI has provided for guidelines to all- India term-lending and refinancing institutions in the matter of disclosures in the notes to accounts in the financial statements with a view to bringing about uniformity in the disclosure practices adopted by various financial institutions (Exim Bank, NABARD, NHB and SIDBI) and improving the degree of transparency in their affairs. The disclosures include disclosures related to capital to risk weighted assets ratio, asset quality and credit concentration, maturity pattern of rupee assets and liabilities, operating results etc.

The SEBI LODR Regulations have been sub-divided into two parts viz. - 1) We have reviewed the accompanying statement of unaudited Standalone financial results of NATIONAL BANK OF AGRICULTURAL AND RURAL DEVELOPMENT (hereinafter referred to as "the bank") for the half year ended on September 30, 2015. This statement of unaudited standalone financial results is the responsibility of the Bank's Management and has been approved by the Board of Directors. Our responsibility is to issue a report on these unaudited standalone financial results based on our review.
- 2) We have conducted our review in accordance with Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This Standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. b) Improvements to Leased Assets are fully charged to revenue in the same year in which such expenses are incurred.

6. Intangible Assets & Amortization:

Expenses incurred on Intangible assets having enduring benefits are capitalized and amortized over their estimated useful life.

7. Employee Benefits:

I. Short term employee benefits

a) Current Tax:

Provision for current tax is made on the basis of estimated taxable income for the accounting year in accordance with the Income Tax Act, 1961.

b) Deferred Tax:

Deferred tax expense or benefits is recognised on timing differences being the difference between taxable and accounting income and are capable of reversal in one or more future periods. The deferred tax charge or credit and the corresponding deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets.

Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realised.

10. Lease Rental Payments:

The company has taken on lease Office building under cancellable lease agreements that are renewable at the option of the company and the Lessor. Lease payments in respect of lease are recognized as an expense in the statement of profit and loss on accrual basis.

11. Provision and Contingencies:

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation.

7/18

ANNEXEURE-I

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

Rating Rationale
National Bank for Agriculture and Rural Development

Tax-Free Bonds Rs.50 Billion	CRISIL AAA/Stable (Assigned)
Bonds Aggregating Rs.1020 Billion	CRISIL AAA/Stable (Reaffirmed)
Rs.230 Billion Commercial Paper	CRISIL A1+ (Reaffirmed)
Rs.60 Billion One-Year Certificate of Deposits Programme	CRISIL A1+ (Reaffirmed)
Rs.1 Billion Fixed Deposits Programme	FAAA/Stable (Reaffirmed)

CRISIL has assigned its '**CRISIL AAA/Stable**' rating to Rs.50 billion Tax-Free bond issue of National Bank for Agriculture and Rural Development (NABARD), and reaffirmed the ratings on its other debt instruments and fixed deposit programme at '**CRISIL AAA/FAAA/Stable/CRISIL A1+**'.

CRISIL's ratings on NABARD's debt instruments and fixed deposit programme continue to be centrally based on the support NABARD receives from the Government of India (GoI), and the key public policy role the institution plays in India's agriculture sector. The ratings also factor in NABARD's strong capitalisation, robust asset protection mechanism, and adequate resource profile. These rating strengths are partially offset by the bank's modest earnings profile.

NABARD is the apex financial institution that implements GoI's policies on planning and credit dispensation to agricultural and rural sectors. It refinances the entire cooperative credit system and banks through short- and long-term loans to help facilitate the flow of agricultural credit. NABARD also plays a developmental role in strengthening the cooperative structure to evolve a sustainable rural financial system to enhance ground level credit flow to farmers and others in rural areas. Over the past few years, the role and scope of NABARD has been significantly enlarged by GoI; NABARD has been entrusted with the management of various development funds including the Rural Infrastructure Development Fund (RIDF). GoI has been providing regular support to NABARD as reflected in the equity capital infusion of Rs.30 billion in a phased manner over the past four years, in line with the pronouncement in the Union Budget of 2011-12 (refers to financial year, April 1 to March 31); of this, Rs.3.0 billion was infused during 2014-15.

NABARD's strong capitalisation is marked by a high overall capital adequacy ratio of 17.5 percent, as on September 30, 2015 (16.9 percent, as on March 31, 2015) and low asset-related risks. NABARD's capital position is also supported by steady accruals. The institution has a strong networth coverage for non-performing assets (NPAs), because of its low gross NPAs and robust asset protection mechanisms; as on September 30, 2015, gross NPAs accounted for only 0.05 percent of its gross advances (0.05 percent as on March 31, 2015). A large share of NABARD's lending is towards borrowers with inherently weak credit risk profiles. Nevertheless, the institution has strong mechanisms in place to manage its credit risk exposure; around 40 percent of its advances are backed by guarantees from state governments and GoI as on September 30, 2015. In addition, NABARD has the mandate to direct RBI to debit current accounts of its borrowers in the instance of default.

NABARD's resource profile is marked by support from GoI. The institution has been recognised as the nodal agency to mobilise RIDF deposits from commercial banks; these

deposits form a significant portion of its borrowings at around 35.04 percent at September 30, 2015 (39 percent at March 31, 2015). NABARD has been permitted to raise Rs.50 billion of tax-free bonds during the current year. It has been allocated Rs.50 billion each in 2013-14 and 2014-15 for lending towards creation of warehousing facilities in the country, as well as Rs.50 billion for long term rural credit in 2014-15. Furthermore, since 2008-09, GoI has been supporting NABARD's resource profile by creating Short-Term Cooperative Rural Credit (ST CRC) Fund and ST RRB Credit Refinance Fund. However, GoI's fiscal management policies and financial reforms in the past few years have led to an increase in the institution's reliance on market borrowings, resulting, in turn, in an increase in its borrowing cost. CRISIL believes that NABARD will maintain an adequate resource profile supported by the steps taken by GoI to augment the former's funding profile. However, more sustainable long-term funding solutions need to be introduced to support NABARD over the medium term.

NABARD has a modest earnings profile, marked by low gross spreads, driven largely by lending at mandated rates and increased dependence on borrowings at market rates. NABARD's profitability, as measured by its return on assets (RoA) increased to 0.9 percent in 2014-15 from 0.8 percent in 2013-14.

Outlook: Stable

CRISIL believes NABARD will continue to receive strong funding and operational support from GoI, and maintain its healthy capitalisation and competitive resource costs over the medium term. The asset protection mechanism available to NABARD is likely to continue. The outlook may be revised to 'Negative' if there is a reduction in GoI's commitment to the agricultural and rural sectors, translating into likelihood of a decline in support to NABARD.

About the Bank

Incorporated in 1982 under an Act of the Indian Parliament, NABARD is governed by the NABARD Act, 1981. NABARD shares supervisory functions with RBI in respect of co-operative banks (other than urban and primary co-operative banks) and regional rural banks (RRBs). GoI and Reserve Bank of India own 99.57 percent and 0.43 percent, respectively, of NABARD's equity share capital.

The bank is the apex refinancing agency providing short- and long-term refinance to state cooperative agricultural and rural development banks, state cooperative banks, RRBs, commercial banks, and other financial institutions approved by RBI to augment credit flow for production and investment purposes in the agriculture and rural sectors. It also plays a developmental role in strengthening the rural financial institutions.

For 2014-15, NABARD reported a profit after tax (PAT) of Rs.24.03 billion on a total income (net of interest expenses) of Rs.48.8 billion, against a PAT of Rs.18.6 billion on a total income (net of interest expenses) of Rs.41.4 billion for the previous year. It reported PAT of Rs.12.5 billion on a total income (net of interest expenses) of Rs.27.5 billion for the first half of 2015-16, against PAT of Rs.11.3 billion on a total income (net of interest expenses) of Rs.23.1 billion for corresponding period of the previous year.

By [Jambakulam Sivakumar](#)

India Ratings and Research (Ind-Ra) has assigned National Bank for Agriculture and Rural Development's (NABARD) INR50bn tax-free bonds an 'IND AAA' rating with a Stable Outlook. This is part of NABARD's INR526.664bn non priority sector bonds programme. A list of NABARD's outstanding ratings is at the end of this commentary.

KEY RATING DRIVERS

Public Policy Institution: NABARD is an apex policy institution and nodal agency for agriculture and rural development in India. It has an active major role in implementing the government of India's (GoI) policies in the socially, politically and economically important agriculture sector.

Regulatory Body: NABARD supervises and conducts statutory inspections of state co-operative banks and regional rural banks and district central cooperative banks.

State Support: The ratings reflect Ind-Ra's expectation of continued timely support from GoI, which infused INR3bn as additional equity into NABARD during FY15. NABARD is 99.60% owned by GoI and 0.40% by the Reserve Bank of India. The bank's strong links with, and high importance to, GoI are evidenced through representation from GoI's Ministries of Agriculture, Rural Development and Finance on its board of directors and by the numerous instances of financial support extended to NABARD by way of budgetary allocations year on year since inception. The appointment of NABARD's board of directors by GoI is according to the statutes of the National Bank for Agriculture and Rural Development Act 1981, under which it is established.

Resources Management: Rural Infrastructure Development Fund (RIDF) deposits continued to be an important source (31.35%) of NABARD's funding in FY15. The source is likely to continue as scheduled commercial banks face difficulties in meeting their priority sector lending targets traditionally. Short Term Cooperative Rural Credit Fund and ST RRB Credit Refinance Fund together form the next major source (31.49%) of funding. The allocation of various funds by GoI to NABARD for various specified purposes has been increasing annually, in tandem with the increasing grassroots level demand.

Funds Deployment: At FYE15, loans to state governments or their agencies accounted for 33.98% of NABARD's loan portfolio. These were all secured by guarantees from state governments. Furthermore, NABARD has the mandate to direct the Reserve Bank of India to debit current accounts of its RIDF loan counterparties in case of a default. NABARD's refinance portfolio (62.40% of loan portfolio at FYE15) is also secured.

Comfortable Capitalisation: A majority of the income is generated by way of interest on loans (FYE15: 85.75%) and investment operations (12.46%), as fee-based income is low. NABARD's capitalisation is comfortable (FYE15 Tier 1 capital ratio: 15.83%), aided by regular equity injections from GoI (FY15: INR3bn, FY14: INR7bn, FY13: INR5bn; FY12: INR10bn). Profitability is moderate and may come under pressure if the low-margin RIDF lending business grows to form a large proportion of the bank's loan portfolio.

Concentration without High Risk: NABARD has significant concentration on its balance sheet, with the top 20 loans accounting for 45.38% of the total loans and total deposits by 20 largest depositors being 85.90% at FYE15. However, the risk is moderate as the loans are fully secured, and the deposits are by commercial banks due to shortages in meeting priority sector lending targets.

Minimal NPAs: NABARD has traditionally reported minimal NPAs as a majority of the business is by way of refinancing and RIDF. Its gross NPL ratio ranged from 0.02% to 0.06% over the last nine years. All of these emanate from the direct and co-finance loans, which comprised around 3.62% of the total loans on 31 March 2015.

RATING SENSITIVITIES

A Negative Outlook could result from Ind-Ra's expectation of reduced government support. This could result from a dilution in NABARD's policy role of financing and developing the agriculture sector in India, or from a significant reduction in GoI's shareholding in the bank.

COMPANY PROFILE

NABARD was established in July 1982 to promote and develop the agriculture and allied rural sectors in India.
